Dial: silver-coloured, guilloché, Roman numerals, date, weekday, month, sunrise and sunset, moon phase, equation of time

Accessories: folding fastening white gold 750, box with watch winder (not functioning), manual, warranty and service booklet

The Jules Audemars Equation of Time is a highly complex, elegant wristwatch. It combines the requirements of a classic timepiece with the functions of an astronomical watch. It features an astronomical calendar and takes into account the equation of time at a specific location. The equation of time is a phenomenon based on the tilt of the Earth's axis and its elliptical orbit around the sun. This results from the deviation between mean and true solar time and can vary depending on the date and geographical position.

Čís. Položky 380
